

JK series Bin tipper

Designed to minimize drop height and optimise gentle tipping, the SRAML bin tipper JK empties various-sized bins into a washer or a hopper, which feeds the fruit onto the conveyor belt for further processing.

*Bin tipper on
swivel casters*

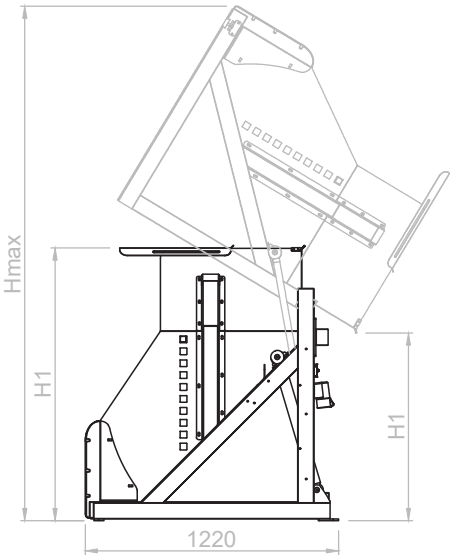

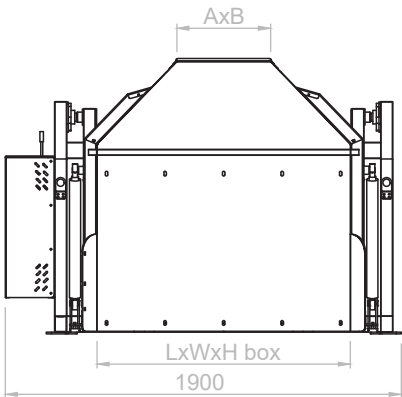

The SRAML line of JK bin tippers mechanically lifts and inverts bins for the purpose of unloading the fruit into a washer or a reception hopper to be fed onto the conveyor belt for further processing.

Once a full bin is loaded onto the tipping cradle by a forklift or pallet jack, the operator starts the tipping motion. Hydraulic lifting cylinders lift and invert the bin, directing the fruit to the adjustable flow gate.

Bin tipper main features include:

- Designed to minimise drop height and optimise gentle tipping
- Adapted to different bin sizes
- Durable and robust construction to withstand the strains of lifting heavy bins and of forklift knocks

Product specifications

Main features:

- Heavy-duty stainless-steel construction with hydraulic lifting cylinders
- Hydraulic unit supplied with protective cover
- Adjustable gate to regulate the fruit flow quantity
- Operating handle to control the tipping motion
- Height-adjustable bin retaining bracket to prevent the bin from falling out

Options:

- Left- or right-handed position of the control box
- Fruit-dosing hopper to maintain an even fruit flow going to the sorting conveyor
- Available in higher discharge height

Dosing hopper between Bin tipper and Conveyor

Technical specifications

		JK400	JK500
Lift. capacity	Kg	400	500
L × W × H (box)	mm	max. 1220x1500x850	
Height (H)	mm	1350	1350
Output height (H1)	mm	920	920
Maximum height (H max)	mm	2550	2550
Output slot (A × B)	mm	470x310	
Weight	kg	330	340
Installed power	kW	0,5
